

TEST DRIVEN DEVELOPMENT

OR HOW TO STOP BEING BAD AT MAKING SOFTWARE

WILL WESLEY

UNIVERSITY OF COLORADO AT COLORADO SPRINGS
DECISION SCIENCE AND CONTROL LAB

APRIL 16, 2021

Industry sucks at software.

No matter the methodology, we ship the hacks.

Software is squishy.

A panacea for the masses: Test the code!

A panacea for the masses: Test the code!

- Manual testing

A panacea for the masses: Test the code!

- Manual testing
- Automated end-to-end testing

A panacea for the masses: Test the code!

- Manual testing
- Automated end-to-end testing
- Automated unit testing

Testing is an afterthought.

Testing is more important than the production code.

Write the tests first.

Red. Green. Refactor.

TDD is a PITA.

KATA!
